Professional Profile

Freelance programmer with experience with HTML, CSS, Java, Python, Visual Basic .NET and a little bit of C++.

University and Personal Experience

2023-present

Universidad CENFOTEC
Bachelor of Software Engineering
Achievements:
While I already had some very basic experience, it is through my learning experience in this course that I am developing more advanced skills for web design and development, including front-end work with Java and similar languages, and basic experience with full-stack projects based on Java and SQL.

2024-present

Personal
https://starryfinita.neocities.org developer
Achievements:
This was my first time working with pure HTML and CSS to build a full website from scratch, without using WYSIWYG tools such as Web Page Maker. It was through this experience that I developed the most important foundational skills for building a basic website.

Academic History

2018-2022

Bachelor's Degree in Secondary Education
